CHEVRON™

The 512 features a 12 ton retracted recovery boom with dual in-line planetary winches complete with air free spool and 150' of 7/16 wire rope. The recovery boom at full extension reaches 71 inches past the tailboard when horizontal and can be elevated up to 41 degrees. The under lift provides up to 78.5 inches of reach with a lift capacity of 7,000 lbs. extended and 9,000 lbs. retracted using the lift forks. 6,000 lb. Drop In L- Arms. The tailboard of the 512 includes rear "D" rings, built in safety chain pockets, recessed area for air and auxiliary light plug ins along with optional multi-position hydraulic rear spades. The 108" CA aluminum modular body provides spacious storage for your tools and attachments including built in storage racks for your 4"x 4" Low Profile Frame Fork Holders. The bolt on rear quarter panels of the 512 provides sleek automotive style and is constructed of high impact composite material that can be easily replaced in case of damage without replacing the entire side. Other features include a large tunnel box; LED body lighting and gas assist shocks on the compartment doors. Elevated Fork Holders also included.
